COTTON LINTERS

About us

We are a leading Indian processors for high grade Cotton Linters for clients worldwide.

Strategically based out in the geographical centre of India, we have a distinct advantage logically in sourcing high quality cotton seeds from the Cotton producing states of India.

Our Moto: Quality over Quantity

We are passionately involved in cleaning of Cotton Linter and meeting the stringent requirements of our clients globally.

We successfully separate and remove fine dust, mud, gravel, seed coat fragments, leaf particles, stems, dirty fibres and other foreign particles through our In-House cleaning infrastructure.

Our Process and more.

We employ the processes of Pneumatic cleaning, Mechanical cylinder beater with screen Moting, Perforated screen shakers with aspiration, Air Separators with filter cloth, Fiber compactor with prime and secondary filters. With these processes we ensure to meet the required final cotton linter parameters. Consistently.

 Production of 200 MT per month, soon to increase to 600 MT per month by 2024 Q1.

 Consistent Quality.

 Lower Contamination and Impurities in Cotton Linters with increased cellulose content.

 Customised and Flexible deliveries.

Lets Connect.
